Services and Pricing

My wife Susan and I are professional photographers serving corporate and individual needs in the photographic industry. Our specialty is capturing high quality images using professional, high end cameras and gear, industry specific software and on-going training to stay on top of this ever-changing field. We entered the photographic field in 1979 and sustained our photography studio/business for over 38 years.

Considering travel in some cases, I have created packages that include that to each location.

After the Shoot - After the images have been shot, the photographer will edit the shoot and select the best images. These will be optimized for quality and delivered to you within 48 business hours, unless otherwise specified.
